

# ST1

## SPRAY GUN

Increase your productivity, spray consistency, and uptime with Carlisle's ST1 Air Purge Spray Gun. This high-performance spray gun features ergonomics for increased comfort and control, quick change mix tips for precision and consistency, and an intuitive design for easy service.

### INCREASED COMFORT AND CONTROL

- Integrated handle wings to better distribute the weight on the sprayer's hand, reducing hot spots and hand fatigue
- Optional hand strap to better secure the gun to the sprayer, allowing for increased control and less grip fatigue
- The ST1 Spray gun is 10% lighter than the leading competition, creating a balanced, lower center of mass

### PRECISE AND CONSISTENT SPRAYING

The ST1 Spray Gun features separate mix chambers and tips that can be mixed and matched to optimize flow and pattern width for every application. The quick and easy change of mix tips on the job allows applicators to seamlessly move from rapid coverage to precise application.

### MODULAR DESIGN FOR QUICK AND INTUITIVE MAINTENANCE

- A  $\frac{5}{16}$  nut driver is the only tool needed to disassemble the spray gun
- Designed with a 2-part mixing chamber and mix tip design
- Integral check valve to prevent fluid from entering the air handle, eliminating crossovers from contaminating the air section of the gun

The ST1 Spray gun is 10% lighter than the leading competition, allowing applicators to spray longer and more consistently.

TOTAL SPRAY SOLUTION, REIMAGINED
