

THE CARLISLE INTELLISPRAY SYSTEM

TOTAL SPRAY SOLUTION, **REIMAGINED**

WHY CHOOSE THE CARLISLE INTELLISPRAY SYSTEM?

As a leader in the spray polyurethane foam (SPF) industry, Carlisle is committed to providing the highest quality products and technical services for the spray foam professional. The IntelliSpray System was specifically designed in conjunction with Carlisle Spray Foam Insulation's complete product portfolio of open and closed cell products, guaranteeing the highest-quality spray foam insulation application. Paired together, Carlisle has reimagined the performance and accuracy of spray foam insulation, along with providing sprayers both material savings and increased productivity.

THE ONE NAME TO KNOW IN SPRAY FOAM

Carlisle is the only company in the industry to offer a complete optimized SPF solution. Trust the tenacity, experience, and resources that you've come to rely on with Carlisle.

MATERIAL SAVINGS

- Estimated \$30,000+ in annual material savings (\$100-\$150 daily) from improved yield and spraying control
- Precise ratio control drives significant material savings and spray consistency

INCREASED PRODUCTIVITY

- Reduced warm up by 50%, allowing sprayers to start up faster on the jobsite
- Quick start up saves 30 minutes a day, the equivalent of one full day per month that you can be spraying
- Time savings: Typical eight-hour jobs now take less than six hours to complete

STATE-OF-THE-ART EQUIPMENT AND PERFORMANCE

Carlisle is the only company to offer a total solution with high quality spray foam products and state of the art equipment. This combination gives you increased productivity, spray consistency, and uptime.

IS40 INTELLISPRAY PROPORTIONER

TRUE RATIO CONTROL & ASSURANCE

- The combination of independent, Servo-driven motors and integral flow meters control the flow of A & B materials to maintain extremely precise on-ratio control, leading to quality installs on every project.
- Carlisle's IntelliSense Technology with sensors in the flow meters shuts down equipment if an off-ratio condition is detected, ensuring 1:1 ratio throughout the entire job.

IMPROVED PRESSURE CONTROL

- The IntelliSpray System provides consistent pressures at the gun, leading to greater yields and productivity.
- Unlike piston pump systems, the IntelliSpray System has the ability to control pressure with the servo-driven gear pumps, resulting in more consistent pressure.

EASY TO LEARN & USE

- Intuitive controls and automation are at your fingertips with a 15" full-color touchscreen with easy to read, easy to use, controls.
- An industrial-grade operating system has features to improve productivity, automate tasks, and provide confirmation the job was completed to spec.

ST1 AIR PURGE SPRAY GUN MORE SPRAY TIME

- Spray tips are designed for quick changes and versatility, while reducing overspray build-up on the gun to keep the sprayer spraying.
- Applicators can spray longer and more consistently, especially in hard-to-reach areas, for maximum uptime, consistent patterns, smoother application, and higher yields.

INCREASED COMFORT & CONTROL

Carlisle's ST1 Spray Gun was designed to reduce sprayer fatigue and increase application consistency

- The handles' wing design transfers the load from an applicator's fingers to their arm, reducing fatigue.
- The optional strap secures the gun to a user's hand allowing the applicator to rest their fingers when not triggering.

The ST1 Spray gun is 10% lighter than the leading competition.

QUICKHEAT HOSE

IMPROVED PROCESS CONTROL

- Communicates seamlessly with the IS40 Proportioner to provide temperature and pressure control at the spray gun.
- Internal heater wire enables over 90°F (50°C) of system DeltaT in the hose, reducing the need for preheating and recirculation.
- Reduced warm up by 50%, allowing sprayers to start up faster on the jobsite.

FINANCE YOUR NEW CARLISLE SPRAY EQUIPMENT

Finance your Carlisle spray equipment over a 12-month term and pay as low as 0% interest on the equipment costs. Shipping, sales tax, and other costs are subject to our standard low rates. Your first payment and document fee are due up front, and the remaining eleven payments will be paid via ACH.
